

Deductive Analysis and GIS Mapping Peer Researcher Training

Number of participants: 19 | **Date:** 28 February-3 March & 13th March

Brief description: Peer Researchers were trained to do GIS Mapping so that they can go back to their hometowns and detect the barriers and enablers in their daily livelihood. They also participated in the deductive analysis of the data they collected from phase 1 of this research.

Organized by: Sightsavers & BRAC James P Grant School of Public Health, BRAC University
